In Pursuit of Perfection

January 27, 2010

Is there really hope in a bottle?

Can we turn back time with creams or serums?

The quest for eternal youth has created a bevy of luxury skincare lines that promise tighter skin, smaller pores, and increased collagen.

These are some of my choice picks so that you don't have to waste time or money during your next search for "Forever Young".

INNOVATIVE SKINCARE®, iS CLINICAL®, pioneered a new strategy in the skincare industry. Based on Science meets Beauty, the line is dedicated to developing clinically validated skincare products that improve the physical and emotional well-being of people globally. Developed by physicians and pharmacologists the anti-aging formulations produce results.

This celebrity fave is effective and worth the money. I love the new **YOUTH EYE™ COMPLEX**. It tightens the skin around the eyes and reduces excess puffiness.
